Hitta rätt produkt och ett leveranssätt som passar dig

Standarder

Genom att följa gällande standard både effektiviserar och säkrar du ditt arbete. Många standarder ingår dessutom ofta i paket.

Tjänster

Abonnemang är tjänsten där vi uppdaterar dig med aktuella standarder när förändringar sker på dem du valt att abonnera på. På så sätt är du säker på att du alltid arbetar efter rätt utgåva.

e-nav är vår online-tjänst som ger dig och dina kollegor tillgång till standarder ni valt att abonnera på dygnet runt. Med e-nav kan samma standard användas av flera personer samtidigt.

Leveranssätt

Du väljer hur du vill ha dina standarder levererade. Vi kan erbjuda dig dem på papper och som pdf.

Andra produkter

Vi har böcker som underlättar arbetet att följa en standard. Med våra böcker får du ökad förståelse för hur standarder ska följas och vilka fördelar den ger dig i ditt arbete. Vi tar fram många egna publikationer och fungerar även som återförsäljare. Det gör att du hos oss kan hitta över 500 unika titlar. Vi har även tekniska rapporter, specifikationer och "workshop agreement".

Matriser är en översikt på standarder och handböcker som bör läsas tillsammans. De finns på sis.se och ger dig en bra bild över hur olika produkter hör ihop.

Standardiseringsprojekt

Du kan påverka innehållet i framtida standarder genom att delta i någon av SIS ca 400 Tekniska Kommittéer.

Find the right product and the type of delivery that suits you

Standards

By complying with current standards, you can make your work more efficient and ensure reliability. Also, several of the standards are often supplied in packages.

Services

Subscription is the service that keeps you up to date with current standards when changes occur in the ones you have chosen to subscribe to. This ensures that you are always working with the right edition.

e-nav is our online service that gives you and your colleagues access to the standards you subscribe to 24 hours a day. With e-nav, the same standards can be used by several people at once.

Type of delivery

You choose how you want your standards delivered. We can supply them both on paper and as PDF files.

Other products

We have books that facilitate standards compliance. They make it easier to understand how compliance works and how this benefits you in your operation. We produce many publications of our own, and also act as retailers. This means that we have more than 500 unique titles for you to choose from. We also have technical reports, specifications and workshop agreements.

Matrices, listed at sis.se, provide an overview of which publications belong together.

Standardisation project

You can influence the content of future standards by taking part in one or other of SIS's 400 or so Technical Committees.

Europastandarden EN ISO 22716:2007 gäller som svensk standard. Detta dokument innehåller den officiella engelska versionen av EN ISO 22716:2007.

The European Standard EN ISO 22716:2007 has the status of a Swedish Standard. This document contains the official English version of EN ISO 22716:2007.

**Denna korrigerade version innehåller följande rättning/
This corrected version contains the following correction:**

Denna standard innehåller nu ISO 22716:2007, Corrected version 2008-05-15.

This standard now contains ISO 22716:2007, Corrected version 2008-05-15.

guten Herstellungspraxis (ISO 22716:2007)

This European Standard was approved by CEN on 16 September 2007.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

Foreword

This document (EN ISO 22716:2007, Corrected version 2008-05-15) has been prepared by Technical Committee ISO/TC 217 "Cosmetics" in collaboration with Technical Committee CEN/TC 392 "Cosmetics" the secretariat of which is held by AFNOR.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by May 2008, and conflicting national standards shall be withdrawn at the latest by May 2008.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN [and/or CENELEC] shall not be held responsible for identifying any or all such patent rights.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and the United Kingdom.

Endorsement notice

The text of ISO 22716:2007, Corrected version 2008-05-15 has been approved by CEN as a EN ISO 22716:2007 without any modification.

Introduction

These guidelines are intended to provide guidance regarding Good Manufacturing Practices for cosmetic products. These guidelines have been prepared for consideration by the cosmetic industry and take into account the specific needs of this sector. These guidelines offer organizational and practical advice on the management of the human, technical and administrative factors affecting product quality.

These guidelines have been written to allow them to be used following the flow of products from receipt to shipment. Additionally, in order to clarify the way this document reaches its objectives, a 'principle' is added to each major section.

Good Manufacturing Practices constitute the practical development of the quality assurance concept through the description of the plant activities that are based on sound scientific judgement and risk assessments. The objective of these GMP guidelines is to define the activities that enable you to obtain a product that meets defined characteristics.

Documentation is an integral part of Good Manufacturing Practices.

Cosmetics — Good Manufacturing Practices (GMP) — Guidelines on Good Manufacturing Practices

1 Scope

This International Standard gives guidelines for the production, control, storage and shipment of cosmetic products.

These guidelines cover the quality aspects of the product, but as a whole do not cover safety aspects for the personnel engaged in the plant, nor do they cover aspects of protection of the environment. Safety and environmental aspects are inherent responsibilities of the company and could be governed by local legislation and regulation.

These guidelines are not applicable to research and development activities and distribution of finished products.

2 Terms and definitions

For the purposes of this document, the following terms and definitions apply.

2.1

acceptance criteria

numerical limits, ranges, or other suitable measures for acceptance of test results

2.2

audit

systematic and independent examination to determine whether quality activities and related results comply with planned arrangements and whether these arrangements are implemented effectively and are suitable for achieving objectives

2.3

batch

defined quantity of raw material, packaging material or product issued from one process or series of processes so that it could be expected to be homogeneous

2.4

batch number

distinctive combination of numbers, letters and/or symbols, which specifically identifies a batch

2.5

bulk product

any product which has completed manufacturing stages up to, but not including, final packaging

2.6

calibration

set of operations that establish, under specified conditions, the relationship between values indicated by a measuring instrument or measuring system, or values represented by a material measure, and the corresponding known values of a reference standard

- 2.7**
change control
internal organization and responsibilities relative to any planned change of one or several activities covered by the Good Manufacturing Practices in order to ensure that all the manufactured, packaged, controlled and stored products correspond to the defined acceptance criteria
- 2.8**
cleaning
all operations that ensure a level of cleanliness and appearance, consisting of separating and eliminating generally visible dirt from a surface by means of the following combined factors, in variable proportions, such as chemical action, mechanical action, temperature, duration of application
- 2.9**
complaint
external information claiming a product does not meet defined acceptance criteria
- 2.10**
contamination
occurrence of any undesirable matter such as chemical, physical and/or microbiological matter in the product
- 2.11**
consumables
materials such as cleaning agents and lubricants that are used up during cleaning, sanitization or maintenance operations
- 2.12**
contract acceptor
person, company or external organization carrying out an operation on behalf of another person, company or organization
- 2.13**
control
verification that acceptance criteria are met
- 2.14**
deviation
internal organization and responsibilities relative to the authorization to deviate from specified requirements due to a planned or unplanned and, in any case, temporary situation concerning one or several activities covered by the Good Manufacturing Practices
- 2.15**
finished product
cosmetic product that has undergone all stages of production, including packaging in its final container, for shipment
- 2.16**
in-process control
controls performed during production in order to monitor and, if appropriate, to adjust the process to ensure that the product meets the defined acceptance criteria
- 2.17**
internal audit
systematic and independent examination made by competent personnel inside the company, the aim of which is to determine whether activities covered by these guidelines and related results comply with planned arrangements and whether these arrangements are implemented effectively and are suitable for achieving objectives

2.18

major equipment

equipment specified in production and laboratory documents which is considered essential to the process

2.19

maintenance

any periodic or unplanned support and verification operations designed to keep premises and equipment in proper working condition

2.20

manufacturing operation

set of operations from the weighing of raw materials to the making of the bulk product

2.21

out-of-specification

examination, measurement or test result that does not comply with defined acceptance criteria

2.22

packaging operation

all packaging steps including filling and labelling, which a bulk product has to undergo in order to become a finished product

2.23

packaging material

any material employed in the packaging of a cosmetic product, excluding any outer packaging used for transportation

NOTE Packaging materials are referred to as primary or secondary according to whether or not they are intended to be in direct contact with the product.

2.24

plant

location for production of cosmetic products

2.25

premises

physical location, buildings and supporting structures used to conduct receipt, storage, manufacturing, packaging, control and shipment of product, raw materials and packaging materials

2.26

production

manufacturing and packaging operations

2.27

quality assurance

all those planned and systematic activities necessary to provide confidence that a product satisfies given acceptance criteria

2.28

raw material

any substance going into or involved in the manufacturing of a bulk product

2.29

recall

decision made by a company to call back a product batch that has been put on the market

2.30

reprocessing

re-treatment of all or part of a batch of finished product or bulk product of an unacceptable quality from a defined stage of production so that its quality may be rendered acceptable by one or more additional operations

2.31

return

sending finished cosmetic products which may or may not present a quality defect back to the plant

2.32

sample

one or more representative elements selected from a set to obtain information about that set

2.33

sampling

set of operations relating to the taking and preparation of samples

2.34

sanitization

operation, used to reduce undesirable micro-organisms on inert contaminated surfaces depending on the objectives set

NOTE

It is the action of reducing generally invisible contaminants from a surface.

2.35

shipment

set of operations relative to the preparation of an order and its putting in a transport vehicle

2.36

waste

any residue of a production operation, transformation or use, any substance, material, product that its holder intends for disposal

3 Personnel

3.1 Principle

Persons involved in the implementation of the activities described in these guidelines should have appropriate training to produce, control and store products with a defined quality.

3.2 Organization

3.2.1 Organization chart

3.2.1.1 The organizational structure should be defined such that the organization and functioning of the staff of the company be understood. It should be appropriate for the size of the company and the diversity of its products.

3.2.1.2 Each company should ensure that there are adequate staffing levels in the different scope of activity, according to the diversity of its production.

3.2.1.3 The organization chart should show the independence, from the other units of the plant, of each quality unit, such as quality assurance unit and quality control unit. The quality assurance and quality control responsibilities can be undertaken by a separate quality assurance unit and a quality control unit, or they can be undertaken by a single unit.
