# Standarder får världen att fungera

*SIS (Swedish Standards Institute) är en fristående ideell förening med medlemmar från både privat och offentlig sektor. Vi är en del av det europeiska och globala nätverk som utarbetar internationella standarder. Standarder är dokumenterad kunskap utvecklad av framstående aktörer inom industri, näringsliv och samhälle och befrämjar handel över gränser, bidrar till att processer och produkter blir säkrare samt effektiviserar din verksamhet.*

## Delta och påverka

Som medlem i SIS har du möjlighet att påverka framtida standarder inom ditt område på nationell, europeisk och global nivå. Du får samtidigt tillgång till tidig information om utvecklingen inom din bransch.

## Ta del av det färdiga arbetet

Vi erbjuder våra kunder allt som rör standarder och deras tillämpning. Hos oss kan du köpa alla publikationer du behöver – allt från enskilda standarder, tekniska rapporter och standardpaket till handböcker och onlinetjänster. Genom vår webbtjänst e-nav får du tillgång till ett lättnavigerat bibliotek där alla standarder som är aktuella för ditt företag finns tillgängliga. Standarder och handböcker är källor till kunskap. Vi säljer dem.

## Utveckla din kompetens och lyckas bättre i ditt arbete

Hos SIS kan du gå öppna eller företagsinterna utbildningar kring innehåll och tillämpning av standarder. Genom vår närhet till den internationella utvecklingen och ISO får du rätt kunskap i rätt tid, direkt från källan. Med vår kunskap om standarders möjligheter hjälper vi våra kunder att skapa verklig nytta och lönsamhet i sina verksamheter.

**Vill du veta mer om SIS eller hur standarder kan effektivisera din verksamhet är du välkommen in på [www.sis.se](http://www.sis.se) eller ta kontakt med oss på tel 08-555 523 00.**

# Standards make the world go round

*SIS (Swedish Standards Institute) is an independent non-profit organisation with members from both the private and public sectors. We are part of the European and global network that draws up international standards. Standards consist of documented knowledge developed by prominent actors within the industry, business world and society. They promote cross-border trade, they help to make processes and products safer and they streamline your organisation.*

## Take part and have influence

As a member of SIS you will have the possibility to participate in standardization activities on national, European and global level. The membership in SIS will give you the opportunity to influence future standards and gain access to early stage information about developments within your field.

## Get to know the finished work

We offer our customers everything in connection with standards and their application. You can purchase all the publications you need from us - everything from individual standards, technical reports and standard packages through to manuals and online services. Our web service e-nav gives you access to an easy-to-navigate library where all standards that are relevant to your company are available. Standards and manuals are sources of knowledge. We sell them.

## Increase understanding and improve perception

With SIS you can undergo either shared or in-house training in the content and application of standards. Thanks to our proximity to international development and ISO you receive the right knowledge at the right time, direct from the source. With our knowledge about the potential of standards, we assist our customers in creating tangible benefit and profitability in their organisations.

**If you want to know more about SIS, or how standards can streamline your organisation, please visit [www.sis.se](http://www.sis.se) or contact us on phone +46 (0)8-555 523 00**

Europastandarden EN 17064:2018 gäller som svensk standard. Detta dokument innehåller den officiella engelska versionen av EN 17064:2018.

The European Standard EN 17064:2018 has the status of a Swedish Standard. This document contains the official version of EN 17064:2018.

EUROPEAN STANDARD

**EN 17064**

NORME EUROPÉENNE

EUROPÄISCHE NORM

November 2018

ICS 45.100

Supersedes CEN/TR 14819-1:2004, CEN/TR 14819-2:2005

English Version

## Safety requirements for cableway installations designed to carry persons - Prevention and fight against fire

Prescriptions de sécurité pour les installations à câbles transportant des personnes - Prévention et lutte contre les incendies

Sicherheitsanforderungen an Seilbahnen für die Personenbeförderung - Brandverhütung und -bekämpfung

This European Standard was approved by CEN on 13 May 2018.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

## SS-EN 17064:2019 (E)

### European foreword

This document (EN 17064:2018) has been prepared by Technical Committee CEN/TC 242 “Safety requirements for cableway installations designed to carry persons”, the secretariat of which is held by AFNOR.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, by May 2019 at the latest, and all conflicting national standards shall be withdrawn no later than May 2019.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights or similar rights. CEN shall not be held responsible for identifying any or all such patent rights.

This document will supersede CEN/TR 14819-1 and CEN/TR 14819-2.

This document has been prepared under a mandate given to CEN by the European Commission and the European Free Trade Association, and supports essential requirements of Regulation (EU) 2016/424.

For the relationship with Regulation (EU) 2016/424, see informative Annex ZA, which is an integral part of this document.

This document comes in response to a request from the European Commission and the CEN and is intended for operators and designers of cableway installations designed to carry persons.

This European standard establishes the safety requirements that apply to prevention and fight against fire in cableway installations designed to carry persons.

This European standard forms part of the standards programme relating to the safety requirements for cableway installations designed to carry persons. This programme comprises the following standards:

- EN 1907, *Safety requirements for cableway installations designed to carry persons – Terminology*;
- EN 12929 (series), *Safety requirements for cableway installations designed to carry persons — General requirements*;
- EN 12930, *Safety requirements for cableway installations designed to carry persons — Calculations*;
- EN 12927 (series), *Safety requirements for cableway installations designed to carry persons — Ropes*;
- EN 1908, *Safety requirements for cableway installations designed to carry persons — Tensioning devices*;
- EN 13223, *Safety requirements for cableway installations designed to carry persons — Drive systems and other mechanical equipment*;
- EN 13796 (series), *Safety requirements for cableway installations designed to carry persons — Carriers*;
- EN 13243, *Safety requirements for cableway installations designed to carry persons — Electrical equipment other than for drive systems*;

- EN 13107, *Safety requirements for cableway installations designed to carry persons — Civil engineering works*;
- EN 1709, *Safety requirements for cableway installations designed to carry persons — Pre-commissioning inspection, maintenance and operational inspection and checks*;
- EN 1909, *Safety requirements for cableway installations designed to carry persons — Recovery and evacuation*;
- EN 12397, *Safety requirements for cableway installations designed to carry persons – Operation*;
- EN 12408, *Safety requirements for cableway installations designed to carry persons — Quality assurance*;
- EN 17064, *Safety requirements for cableway installations designed to carry persons — Fire prevention and firefighting*.

Together these form a series of standards regarding the design, manufacture, construction, maintenance and operation of all cableway installations designed to carry persons.

According to the CEN/CENELEC Internal Regulations, the national standards organisations of the following countries are required to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, the Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Norway, Poland, Portugal, the Republic of Serbia, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

## SS-EN 17064:2019 (E)

### 1 Scope

This European standard establishes the safety requirements that apply to prevention and fight against fire in cableway installations designed to carry persons.

This standard defines safety principles relating to the prevention of and fight against fires in terms of design, operability and maintainability of cableway installations, and operation and maintenance instructions.

This document supplements the existing standards listed in the foreword exclusively in respect of aspects of fire prevention and firefighting.

This standard does not apply to cableway installations for the transportation of goods nor to lifts.

### 2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the cited edition applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

EN 1021-1, *Furniture — Assessment of the ignitability of upholstered furniture — Part 1: Ignition source: smouldering cigarette*

EN 1021-2, *Furniture — Assessment of the ignitability of upholstered furniture — Part 2: Ignition source: match flame equivalent*

EN 1838, *Lighting applications — Emergency lighting*

EN 1907, *Safety requirements for cableway installations designed to carry persons — Terminology*

EN 12929-1, *Safety requirements for cableway installations designed to carry persons — General requirements — Part 1: Requirements for all installations*

EN 13243:2015, *Safety requirements for cableway installations designed to carry persons — Electrical equipment other than for drive systems*

EN 13501-1:2007+A1:2009, *Fire classification of construction products and building elements — Part 1: Classification using test data from reaction to fire tests*

EN 50172, *Emergency escape lighting systems*

EN 50272-1, *Safety requirements for secondary batteries and battery installations — Part 1: General safety information*

EN 50272-2, *Safety requirements for secondary batteries and battery installations — Part 2: Stationary batteries*

EN 60204-1, *Safety of machinery — Electrical equipment of machines — Part 1: General requirements (IEC 60204-1)*

EN 60695-11-10, *Fire hazard testing — Part 11-10: Test flames — 50 W horizontal and vertical flame test methods (IEC 60695-11-10)*

EN 61730-1, *Photovoltaic (PV) module safety qualification — Part 1: Requirements for construction (IEC 61730-1)*

EN 61730-2, *Photovoltaic (PV) module safety qualification — Part 2: Requirements for testing (IEC 61730-2)*

EN ISO 7010, *Graphical symbols — Safety colours and safety signs — Registered safety signs (ISO 7010)*

EN ISO 8528-13, *Reciprocating internal combustion engine driven alternating current generating sets — Part 13: Safety (ISO 8528-13)*

### 3 Terms and definitions

For the purposes of this document, the terms and definitions given in EN 1907 and the following apply.

ISO and IEC maintain terminological databases for use in standardization at the following addresses:

- IEC Electropedia: <http://www.electropedia.org/>
- ISO Online browsing platform: <http://www.iso.org/obp>

NOTE Where definitions are identical to those in the EN 13501 series, this is indicated.

#### 3.1

##### **fire resistance**

ability of an object to maintain for a specified period the required fire stability, fire integrity, thermal insulation and/or any other required function specified in a standardized fire resistance test

Note 1 to clause: The qualifier "fire resistant" only applies to this ability.

#### 3.2

##### **reaction to fire**

behaviour of a material that, as a result of its own decomposition, feeds a fire to which it is exposed under specified conditions

[SOURCE: EN 13501-1:2007+A1:2009, 3.1.15, amended — "Product" has been replaced with "material" and the structure of this definition has been amended slightly.]

#### 3.3

##### **R – Load-bearing capacity**

load-bearing capacity R is the ability of one or more surfaces of a building element to withstand exposure to fire for a given duration under defined mechanical actions, without loss of structural stability

[SOURCE: EN 13501-2:2016, 5.2.1]

#### 3.4

##### **E – Fire integrity criterion**

fire integrity criterion E is the ability of one side of a separating building element to resist exposure to fire, without transferring the fire to the unexposed side through passage of large quantities of flame or hot gas to the non-exposed side

[SOURCE: EN 13501-2:2016, 5.2.2.1]
