# Standarder får världen att fungera

*SIS (Swedish Standards Institute) är en fristående ideell förening med medlemmar från både privat och offentlig sektor. Vi är en del av det europeiska och globala nätverk som utarbetar internationella standarder. Standarder är dokumenterad kunskap utvecklad av framstående aktörer inom industri, näringsliv och samhälle och befrämjar handel över gränser, bidrar till att processer och produkter blir säkrare samt effektiviserar din verksamhet.*

## Delta och påverka

Som medlem i SIS har du möjlighet att påverka framtida standarder inom ditt område på nationell, europeisk och global nivå. Du får samtidigt tillgång till tidig information om utvecklingen inom din bransch.

## Ta del av det färdiga arbetet

Vi erbjuder våra kunder allt som rör standarder och deras tillämpning. Hos oss kan du köpa alla publikationer du behöver – allt från enskilda standarder, tekniska rapporter och standardpaket till handböcker och onlinetjänster. Genom vår webbtjänst e-nav får du tillgång till ett lättnavigerat bibliotek där alla standarder som är aktuella för ditt företag finns tillgängliga. Standarder och handböcker är källor till kunskap. Vi säljer dem.

## Utveckla din kompetens och lyckas bättre i ditt arbete

Hos SIS kan du gå öppna eller företagsinterna utbildningar kring innehåll och tillämpning av standarder. Genom vår närhet till den internationella utvecklingen och ISO får du rätt kunskap i rätt tid, direkt från källan. Med vår kunskap om standarders möjligheter hjälper vi våra kunder att skapa verklig nytta och lönsamhet i sina verksamheter.

**Vill du veta mer om SIS eller hur standarder kan effektivisera din verksamhet är du välkommen in på [www.sis.se](http://www.sis.se) eller ta kontakt med oss på tel 08-555 523 00.**

# Standards make the world go round

*SIS (Swedish Standards Institute) is an independent non-profit organisation with members from both the private and public sectors. We are part of the European and global network that draws up international standards. Standards consist of documented knowledge developed by prominent actors within the industry, business world and society. They promote cross-border trade, they help to make processes and products safer and they streamline your organisation.*

## Take part and have influence

As a member of SIS you will have the possibility to participate in standardization activities on national, European and global level. The membership in SIS will give you the opportunity to influence future standards and gain access to early stage information about developments within your field.

## Get to know the finished work

We offer our customers everything in connection with standards and their application. You can purchase all the publications you need from us - everything from individual standards, technical reports and standard packages through to manuals and online services. Our web service e-nav gives you access to an easy-to-navigate library where all standards that are relevant to your company are available. Standards and manuals are sources of knowledge. We sell them.

## Increase understanding and improve perception

With SIS you can undergo either shared or in-house training in the content and application of standards. Thanks to our proximity to international development and ISO you receive the right knowledge at the right time, direct from the source. With our knowledge about the potential of standards, we assist our customers in creating tangible benefit and profitability in their organisations.

**If you want to know more about SIS, or how standards can streamline your organisation, please visit [www.sis.se](http://www.sis.se) or contact us on phone +46 (0)8-555 523 00**

Den internationella standarden ISO 30301:2019 gäller som svensk standard. Detta dokument innehåller den officiella engelska versionen av ISO 30301:2019.

Denna standard ersätter SS-ISO 30301:2011, utgåva 1

The International Standard ISO 30301:2019 has the status of a Swedish Standard. This document contains the official English version of ISO 30301:2019.

This standard supersedes the SS-ISO 30301:2011, edition 1

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see [www.iso.org/directives](http://www.iso.org/directives)).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see [www.iso.org/patents](http://www.iso.org/patents)).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see [www.iso.org/iso/foreword.html](http://www.iso.org/iso/foreword.html).

This document was prepared by Technical Committee ISO/TC 46, *Information and documentation*, Subcommittee SC 11, *Archives/records management*.

This second edition cancels and replaces the first edition (ISO 30301:2011), which has been technically revised to fully follow the common text of the high level structure (HLS) for all ISO management systems standards (MSS), and to align operational requirements with the guidelines in ISO 15489.

The main changes compared to the previous edition are as follows:

- a new subclause, [4.1.2](#) Records requirements, has been added;
- [subclauses 8.2](#) and [8.3](#) have been redrafted;
- the requirements in [Annex A](#) have been renamed and reordered. Requirements numbered A.1.1.1 and A.1.1.2 are now included in [8.2](#), A.2.5.7 has been deleted from [Annex A](#).

ISO 30301 is part of a family of International Standards on management systems for records.

A list of all products in the ISO 30300 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at [www.iso.org/members.html](http://www.iso.org/members.html).

## Introduction

### 0.1 General

Organizational success largely depends upon implementing and maintaining a management system that is designed to continually improve performance while addressing the needs of all interested parties. Management systems offer methodologies to make decisions and manage resources in order to achieve the organization's goals.

Creation and management of records are integral to any organization's activities, processes and systems. They enable business efficiency, accountability, risk management and business continuity. They also enable organizations to capitalize on the value of their information resources as strategic assets, and to contribute to the preservation of collective memory, in response to the challenges of the global and digital environment.

### 0.2 Management system

Management system standards (MSS) provide tools for top management to implement a systematic and verifiable approach to organizational control in an environment that encourages good business practices.

The standards on management systems for records are designed to assist organizations of all types and sizes, or groups of organizations with shared business activities, to implement, operate and improve an effective management system for records (MSR). The MSR directs and controls an organization for the purposes of establishing a policy and objectives with regard to records and achieving those objectives. This is done through the use of:

- defined roles and responsibilities;
- systematic processes;
- measurement and evaluation;
- review and improvement.

Implementation of a records policy and objectives soundly based on the organization's requirements will ensure that authoritative and reliable information about, and evidence of, business activities is created, managed and made accessible to those who need it for as long as required. Successful implementation of good records policy and objectives results in records and records systems adequate for all of an organization's purposes.

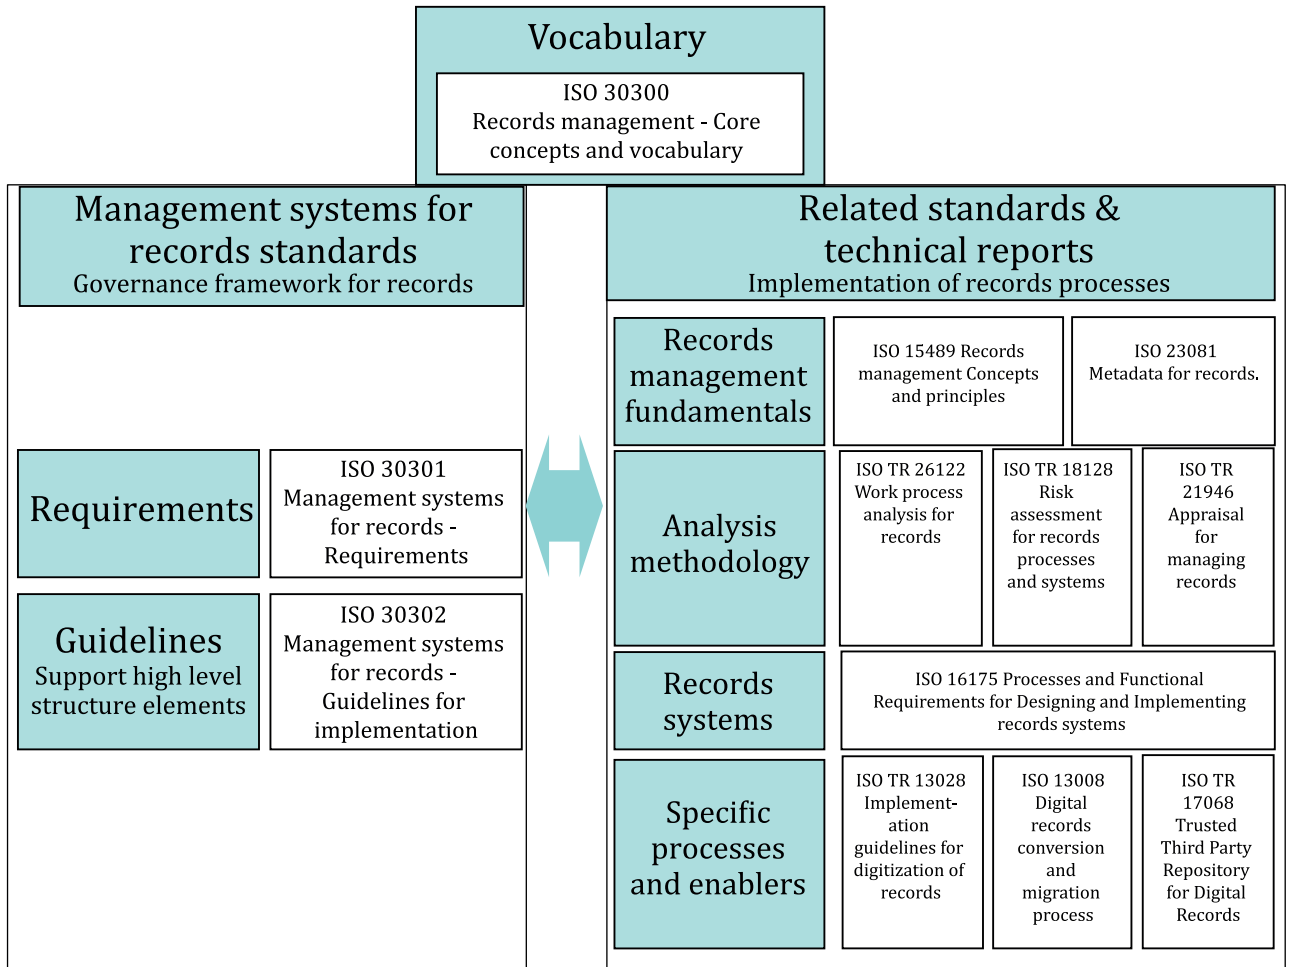

Implementing an MSR in an organization also guarantees the transparency and traceability of decisions made by responsible management and the recognition of public interest.

### 0.3 Relationship with other records standards

The standards on MSR are developed within the MSS framework to be compatible and to share elements and methodology with other MSS. ISO 15489-1, together with other International Standards and Technical Reports, are the principal tools for designing, implementing, monitoring and improving records processes and controls, which operate under the governance of the MSR where organizations decide to implement MSS methodology.

NOTE ISO 15489 is the foundation standard which codifies best practice for records management operations.

The structure of standards on MSR and the most relevant products for implementing records processes and controls, either published or under preparation, is shown in [Figure 1](#).

NOTE Titles of some products and technical reports are susceptible to change when they are revised. Titles in this figure represent the subject or domain, not the complete official titles of published standards and technical reports. An updated figure with new products is available at <https://committee.iso.org/home/tc46sc11>.

**Figure 1 — Standards on MSR and related International Standards and Technical Reports**

**0.4 MSR family of standards**

This family of standards is intended to be used in support of:

- a) top management who make decisions regarding the establishment and implementation of management systems within their organization;
- b) people responsible for the implementation of MSR, such as professionals in the areas of risk management, auditing, management of records, information technology and information security.

The process approach incorporated to a management system for records emphasizes the importance of:

- identifying the organization's records requirements, including interested parties' needs and expectations, and establishing policy and objectives for records;
- implementing and operating controls for managing an organization's risks in relation to its records, in the context of its overall business risks;
- monitoring and reviewing the performance and effectiveness of the MSR;
- continual improvement based on objective measurement.

[Figure 2](#) represents the structure of this document in process approach.

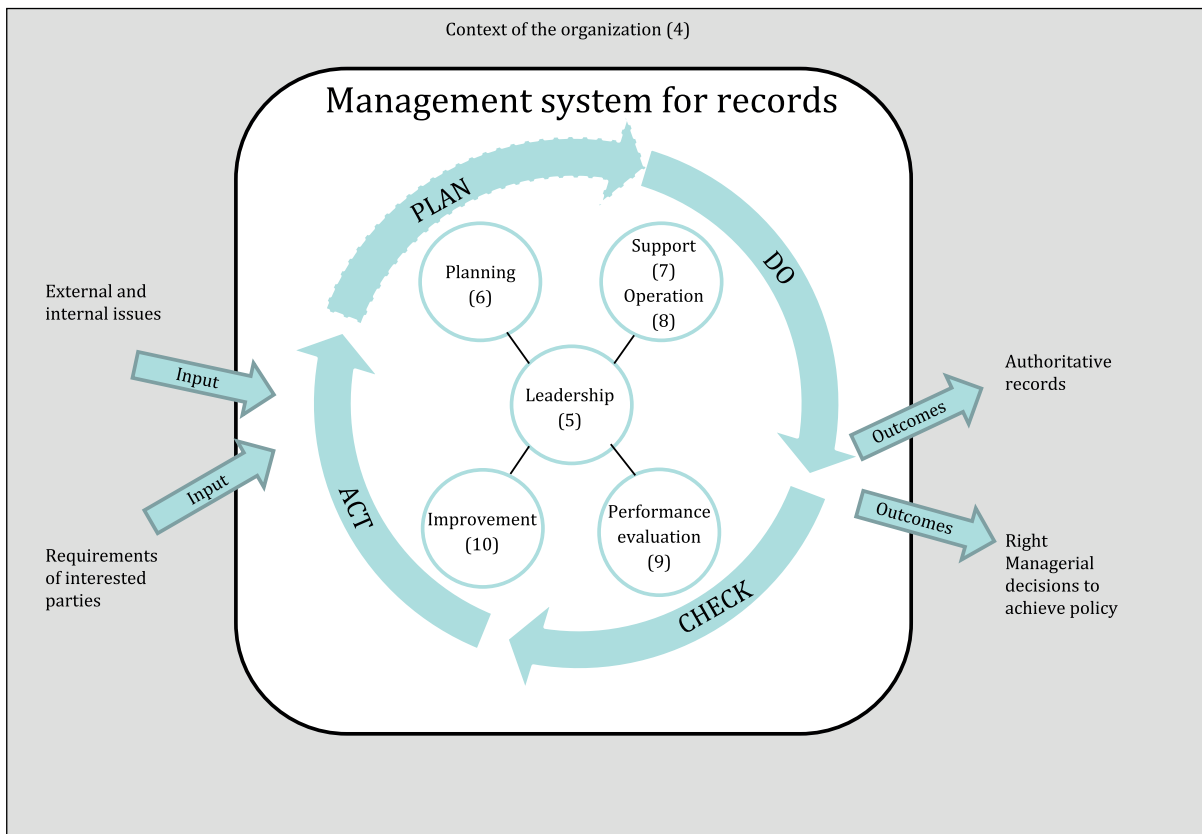

Figure 2 — Structure of MSR in process approach

### 0.5 Relationship and compatibility with other management system standards

This document conforms to ISO’s requirements for management system standards. These requirements include a high-level structure, identical core text, common terms with core definitions, designed to benefit users implementing multiple ISO management system standards.

The term “documented information” is one of the core terms for MSS. Requirements related to documented information are given in 7.5. in all MSS. This document, apart from constituting a MSS itself, can support organizations to implement the documented information requirements of other management systems. For more information, see <https://committee.iso.org/home/tc46sc11>).

# Information and documentation — Management systems for records — Requirements

## 1 Scope

This document specifies requirements to be met by a management system for records (MSR) in order to support an organization in the achievement of its mandate, mission, strategy and goals. It addresses the development and implementation of a records policy and objectives and gives information on measuring and monitoring performance.

An MSR can be established by an organization or across organizations that share business activities. Throughout this document, the term “organization” is not limited to one organization but also includes other organizational structures.

This document is applicable to any organization that wishes to:

- establish, implement, maintain and improve an MSR to support its business;
- ensure itself of conformity with its stated records policy;
- demonstrate conformity with this document by
  - a) undertaking a self-assessment and self-declaration, or
  - b) seeking confirmation of its self-declaration by a party external to the organization, or
  - c) seeking certification of its MSR by an external party.

## 2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

ISO 30300, *Information and documentation — Management systems for records — Fundamentals and vocabulary*

## 3 Terms and definitions

For the purposes of this document, the terms and definitions given in ISO 30300 and the following apply.

ISO and IEC maintain terminological databases for use in standardization at the following addresses:

- ISO Online browsing platform: available at <https://www.iso.org/obp>
- IEC Electropedia: available at <http://www.electropedia.org/>

### 3.1

#### **organization**

person or group of people that has its own functions with responsibilities, authorities and relationships to achieve its *objectives* (3.8)

Note 1 to entry: The concept of organization includes, but is not limited to sole-trader, company, corporation, firm, enterprise, authority, partnership, charity or institution, or part or combination thereof, whether incorporated or not, public or private.

## SS-ISO 30301:2019 (E)

### 3.2 interested party stakeholder

person or *organization* (3.1) that can affect, be affected by, or perceive itself to be affected by a decision or activity

### 3.3 requirement

need or expectation that is stated, generally implied or obligatory

Note 1 to entry: “Generally implied” means that it is custom or common practice for the organization and interested parties that the need or expectation under consideration is implied.

Note 2 to entry: A specified requirement is one that is stated, for example in documented information.

### 3.4 management system

set of interrelated or interacting elements of an *organization* (3.1) to establish *policies* (3.7) and *objectives* (3.8) and *processes* (3.12) to achieve those objectives

Note 1 to entry: A management system can address a single discipline or several disciplines.

Note 2 to entry: The system elements include the organization’s structure, roles and responsibilities, planning and operation.

Note 3 to entry: The scope of a management system may include the whole of the organization, specific and identified functions of the organization, specific and identified sections of the organization, or one or more functions across a group of organizations.

### 3.5 top management

person or group of people who directs and controls an *organization* (3.1) at the highest level

Note 1 to entry: Top management has the power to delegate authority and provide resources within the organization.

Note 2 to entry: If the scope of the *management system* (3.4) covers only part of an organization, then top management refers to those who direct and control that part of the organization.

### 3.6 effectiveness

extent to which planned activities are realized and planned results achieved

### 3.7 policy

intentions and direction of an *organization* (3.1), as formally expressed by its *top management* (3.5)

### 3.8 objective

result to be achieved

Note 1 to entry: An objective can be strategic, tactical, or operational.

Note 2 to entry: Objectives can relate to different disciplines (such as financial, health and safety, and environmental goals) and can apply at different levels [such as strategic, organization-wide, project, product and *process* (3.12)].

Note 3 to entry: An objective can be expressed in other ways, e.g. as an intended outcome, a purpose, an operational criterion, as an MSR objective, or by the use of other words with similar meaning (e.g. aim, goal, or target).

Note 4 to entry: In the context of MSR, MSR objectives are set by the organization, consistent with the MSR policy, to achieve specific results.

### 3.9

#### **risk**

effect of uncertainty

Note 1 to entry: An effect is a deviation from the expected — positive or negative.

Note 2 to entry: Uncertainty is the state, even partial, of deficiency of information related to, understanding or knowledge of, an event, its consequence, or likelihood.

Note 3 to entry: Risk is often characterized by reference to potential “events” (as defined in ISO Guide 73:2009, 3.5.1.3) and “consequences” (as defined in ISO Guide 73:2009, 3.6.1.3), or a combination of these.

Note 4 to entry: Risk is often expressed in terms of a combination of the consequences of an event (including changes in circumstances) and the associated “likelihood” (as defined in ISO Guide 73:2009, 3.6.1.1) of occurrence.

### 3.10

#### **competence**

ability to apply knowledge and skills to achieve intended results

### 3.11

#### **documented information**

information required to be controlled and maintained by an *organization* (3.1) and the medium on which it is contained

Note 1 to entry: Documented information can be in any format and media, and from any source.

Note 2 to entry: Documented information can refer to:

- the *management system* (3.4), including related *processes* (3.12);
- information created in order for the organization to operate (documentation);
- evidence of results achieved (records).

### 3.12

#### **process**

set of interrelated or interacting activities which transforms inputs into outputs

### 3.13

#### **performance**

measurable result

Note 1 to entry: Performance can relate either to quantitative or qualitative findings.

Note 2 to entry: Performance can relate to the management of activities, *processes* (3.12), products (including services), systems or *organizations* (3.1).

### 3.14

#### **outsource**, verb

make an arrangement where an external *organization* (3.1) performs part of an organization’s function or *process* (3.12)

Note 1 to entry: An external organization is outside the scope of the *management system* (3.4), although the outsourced function or process is within the scope.

### 3.15

#### **monitoring**

determining the status of a system, a *process* (3.12) or an activity

Note 1 to entry: To determine the status, there may be a need to check, supervise or critically observe.

### 3.16

#### **measurement**

*process* (3.12) to determine a value
