Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the WTO principles in the Technical Barriers to Trade (TBT) see the following URL: [Foreword - Supplementary information](#)

Amendment 1 to ISO 668:2013 was prepared by Technical Committee TC 104, *Freight containers*, Subcommittee SC 1, *General purpose containers*.

Series 1 freight containers — Classification, dimensions and ratings

AMENDMENT 1

Page 4, 5.3.2.1

Replace the whole paragraph by the following:

Internal dimensions of containers shall be as large as possible, but, in any case greater or equal to those given in Table 3 except:

- containers type G3, having partial opening(s) in the side(s), shall comply with the requirements for minimum internal length and height as given in Table 3;
- containers type G9, when fitted with roof opening(s), shall comply with the requirements for minimum internal length and width as given in Table 3;
- closed, ventilated containers type V2, when fitted internal ventilation equipment, shall comply with the requirements for minimum internal height and width as given in Table 3.

Page 4, 5.3.2.2

Delete “(types 00 and 02)” in all three paragraphs.

Page 4, 5.3.3

Replace “The minimum internal width shall be 2 200 mm (7 ft 2 5/8 in) for container types 20, 21, 22, 30, 31, 32, 40, 41 and 42” by “The minimum internal width shall be 2 200 mm (7 ft 2 5/8 in) for all thermal container types.”
